

ALBERTA TURNPOINT LIST

This list has been compiled from turnpoint sets of past competitions and other often-used TPs for record/badge flights. This is your list, so if you see any errors or want to add new TPs, give me a call. As yet, there are no TPs listed from the Cold Lake or Grande Prairie club areas.

NOTE This list can be accessed in any flight recorder download format by going to
<http://acro.harvard.edu/SOARING/JL/TP/Alberta//files.html>

Many elevator TPs have vanished. Please advise of any changes you become aware of. Most urnpoint locations have been validated using 1:50,000 charts(errors are of the order of a few tenths of a minute) or GPS. If you have a GPS and can stop at any of the listed TPs, please get a good readout on the location. Thanks.

Code The six character (max) designator for loading into a GPS memory
 Elev Elevation is correct to about +/- 20 feet.
 Type T (turnpoint), G (turf runway), A (hard runway)
